HC4200FEHR

HC4200FEHR Bariatric Full Electric Bed

42-inch full electric bed with solid deck

Configuration shown; confirm mattress and rail inclusion.

The HC4200FEHR is a full-electric bariatric bed with a pan deck, included head and footboards and a listed 600lb capacity. It has a standard 42-inch width, with a separate optional kit for a wider configuration.

Keep standard and optional width separate

The HCP48X width-extension kit changes the listed bed width to 48 inches and is optional. The 48-inch measurement should therefore stay attached to that kit-equipped configuration rather than being presented as the standard bed width.

Coordinate the bed components

The bed is listed at 80 inches long, with minimum and maximum heights of 18 and 26.5 inches. Confirm the mattress, rails, powered-adjustment details and complete-load rating basis with ProLine as part of the final bariatric bed setup.

FEATURES

- 600 lb weight capacity
- Full electric bed
- Head and footboards included
