HC9700

Non-Tilt Spring Loaded Overbed Table

Adjustable overbed table

HC9700 product image

The HC9700 is a non-tilt, spring-loaded overbed table. It provides an adjustable table format for bedside items while keeping the tabletop in the listed non-tilting configuration.

A level tabletop configuration

Spring-loaded adjustment changes the table position while the top retains its non-tilting configuration. Check base clearance and the required working height against the intended bedside space.

Check the working dimensions

Tabletop size, height range and load limit need confirmation from ProLine. Ask for those details and the product-specific adjustment and care instructions when planning the room arrangement.

FEATURES

- Non-tilt tabletop
- Spring-loaded adjustment
